

### 1. Browse Searching by:

- Subject
- Author (last name first)
- Title or Series
- LC Call Number
- Dewey Call Number (Holy Cross, SMC, Bethel)
- SUDOC number

This was among the highest priorities of requests we received from the University Committee on Libraries. Many researchers are accustomed to using browse search in Catalog Classic. It gives them the ability to find relevant material on a subject or by an author, etc. very quickly.

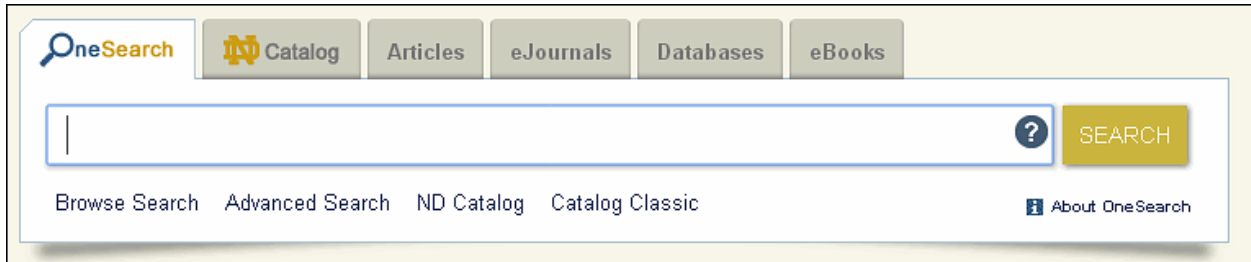

Now that it is also available in ND Catalog, researchers will be able to efficiently identify related resources available to them.

Here is the current version with the [ND Catalog](#) tab selected:

A screenshot of the ND Catalog search interface. At the top, there is a navigation bar with tabs: "OneSearch" (with a magnifying glass icon), "ND Catalog" (selected, with a book icon), "Articles", "eJournals", "Databases", and "eBooks". Below the tabs is a search box containing the text "Find books, music, movies, etc. in ND and area libraries". To the right of the search box is a yellow "SEARCH" button. Below the search box is a checkbox labeled "Include Partner Libraries". At the bottom of the search area are three links: "Advanced search", "Catalog Classic", and "WorldCat". In the bottom right corner, there is a link "About ND Catalog" preceded by an information icon.

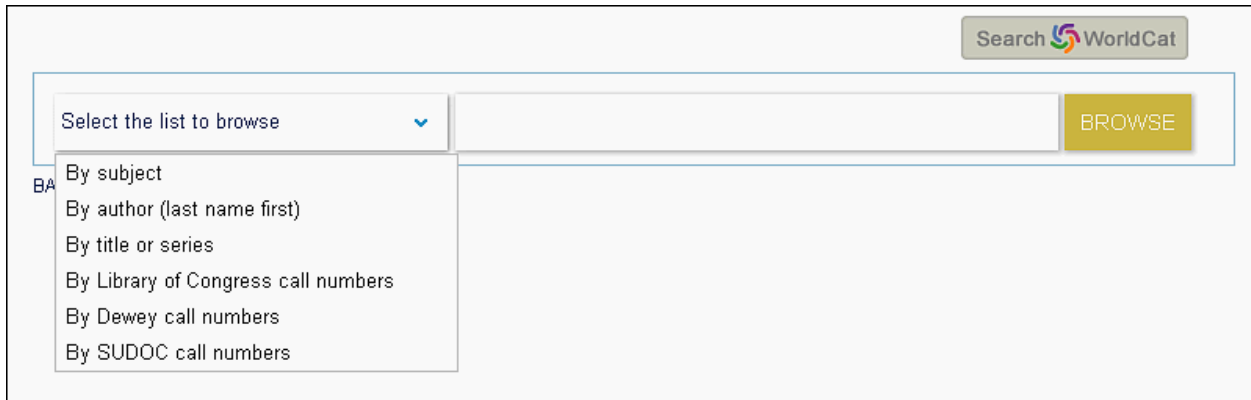

Do you see any way to browse search?

Find the browse search link in Primo 4.

The screenshot shows the Primo 4 search interface. At the top, there is a navigation bar with the 'OneSearch' logo and several tabs: 'Catalog', 'Articles', 'eJournals', 'Databases', and 'eBooks'. Below this is a large search input field with a magnifying glass icon on the left and a 'SEARCH' button on the right. Below the search field, there are links for 'Browse Search', 'Advanced Search', 'ND Catalog', and 'Catalog Classic'. On the far right, there is a link for 'About OneSearch'.

When you click on the Browse Search link you will get a new interface with a dropdown menu of browse search types.

The screenshot shows the WorldCat browse search interface. At the top right, there is a 'Search WorldCat' button. Below this is a large search input field with a 'BROWSE' button on the right. To the left of the input field is a dropdown menu labeled 'Select the list to browse'. The dropdown menu is open, showing a list of options: 'By subject', 'By author (last name first)', 'By title or series', 'By Library of Congress call numbers', 'By Dewey call numbers', and 'By SUDOC call numbers'.

How do you think browse searching would help you if you were studying a new topic?
