

## 2. Improvements to Details Tab - Part I:

- Improved layout enables quick scan of content - no more scrolling within sections
- Collapse/expand long sections - *Show more* link displays if more than 5 lines of text
- Author/Contributor links work with Advanced Search to get logical results

Search for “mahler’s decade in vienna” in [ND Catalog](#). Open the Details tab. Notice that the tab opens in its own scrollable window. This record contains a great deal of information and it is hard to find specific details because of the text crowding.

The image shows two screenshots of the ND Catalog interface, specifically the Details tab for the record "Mahler's decade in Vienna".

The top screenshot shows the record details in a scrollable window. The "Title" is "Mahler's decade in Vienna" and the "Contributor" list includes Gustav Mahler, Irene Abendroth, Anna Bahr-Mildenburg, Lola Beeth, Theodor Betram, Elsa Bland, Hermine Bosetti, Ellen Brandt-Förster, Hans Breuer, and Charles Cahier. A "Links" section shows a link to "This item in WorldCat®".

The bottom screenshot shows the same record details, but with the "Related Titles" and "Contents" sections expanded. The "Related Titles" section lists various titles, and the "Contents" section lists the contents of the CD, including tracks like "Je suis Titania", "Mama, non m'ama", "Mascagni", "Abendlich strahlt", "Wagner", "Theodor Betram", "O patria mia", "Verdi", "Zum Leiden bin ich auserkoren", "Mozart", "Hermione Bosetti", "Coppelia", "Valse", "Delibes", "Crudel perchè finora", "Mozart", "Ellen Brandt-Förster", "Als züllendes Kind", "Wagner", "Hans Breuer", "Habanera", "Air des cartes", "Bizet", "Ein Mädchen verloren", "Weber", "Ja vas lyublyu", "Tchaikovsky", "Leopold Demuth", "Plus blanche que la blanche hermine", "Meyerbeer", "Andreas Dippel", "Lockruf", "Der Freund ist dein", "Goldmark", "Elise Elizza", "Non t'amo più", "Denza", "Benedikt Felix", "Printemps qui commence", "Saint-Saëns", "Ottile Fellwock", "Connais-tu le pays?", "Thomas", "Frieda Felser", "Kommt ein schlanker Bursch", "gegangen", "Weber", "Grete Forst", "Air des bijoux", "Gounod", "Gertrude Förstel", "Ten lasky sen", "Smetana", "Das süsse Lied verhallt", "Wagner", "Berta Förster-Lauterer", "Prinz Eugen", "Loewe", "Montz Frauscher", "Nun eilt herbei", "Nicolai", "Marie Gutheil-Schoder", "CD 2: Alberichs Fluch", "Wagner".

Try the same search in the [Primo 4 version](#). Look at the record in the Details tab. Now it opens up the Details section to occupy the horizontal space on the page. There is no longer a need to scroll within the tab. Any sections that contain more than 5 lines offer a *more* link to expand for the additional information. In Primo 4, each item in the section displays on its own line, making it easier for the eye to scan.
